# **Suzlon signs one of the largest contracts in the history of US wind power industry**

*PPM Energy agrees to option bringing contract total to 700MW*

**Chicago/Pune:** Suzlon Wind Energy Corporation, the US-based subsidiary of Suzlon Energy A/S of Denmark, just extended its contract with PPM Energy to add 300 MW of wind turbine capacity to become one of the largest single contracts in the history of the company and the U.S. wind energy industry. The original agreement calls for delivery of 300 MW of turbine capacity in 2008 and 100 MW of capacity in 2009, but now has been extended to include an additional 300 MW in 2009 for a total of 700 MW over two years.

"We're exceptionally pleased that PPM Energy has exercised their option to bring Suzlon and the industry a historic contract," said Andris Cukurs, CEO of Suzlon Wind Energy Corporation of Chicago, Illinois. "This partnership is one for the long-haul. Suzlon is looking forward to providing PPM outstanding customer relations, optimal power performance and a long-term commitment to the market place," he added.

Suzlon's S88-2.1 MW wind turbine is the featured machine of the agreement and will be delivered to various ready-to-build sites across the US starting in the summer of 2008.

"Suzlon has welcomed PPM Energy's technical and engineering input and provided direct communication lines with the leaders of the company," said Terry Hudgens, CEO of PPM Energy. "Suzlon continues to focus on the future of renewable energy which aligns very well with the strategies and values of PPM Energy."

PPM Energy is part of the IBERDROLA group of companies, the world leader in wind power, with more than 6,500 MW of combined wind power capacity.

The turbine agreement includes the total supply of 143 units of the S88-2.1 MW in 2008 and 191 units in 2009. Suzlon is also contracted for operations, maintenance and service of the wind turbines for two years and an option for five, and will do so by expanding its service territory with new facilities to meet the demand.

### **About Suzlon Energy Ltd.**

Suzlon Energy Limited is one of the pioneers in the wind energy industry. The company has come to the fore of the business by strategically focusing on innovation and research, an integrated value chain, and entering into emerging and high growth markets to drive sustainable growth.

Given the truly global nature of its business, Suzlon has established a Group management center in Amsterdam, Netherlands, and manages its international marketing effort out of Aarhus, Denmark, while runs its India operations out of Pune, India. The company's global spread reflects in its projects portfolio - extending across Australia, Brazil, China, India, Italy, Portugal, South Korea and the United States.

Suzlon's R&D effort also leverages this reach, in a highly successful practice of leveraging skill and knowledge pools in the industry and allied areas the world over. This has resulted in a research and development network located across geographies known for their leadership in the field – Suzlon today drives component R&D from Belgium, turbine development from India and Germany, and aerodynamics research in the Netherlands. Suzlon matches innovation with quality, with systems certified by Det Norske Veritas (DNV) to ISO 9001:2000 standards.

Suzlon is one of the most integrated wind turbine manufacturers – with manufacturing capacity ranging from components to complete wind turbine systems, the entire value chain. The company has established manufacturing facilities around the world, to support the global spread of its operations. Suzlon today has manufacturing facilities in Belgium, China, India and the United States – covering the entire value chain from wind turbine components to complete wind turbine systems. Suzlon has a combined manufacturing base of 2,700 MW of annual capacity, and is undertaking an aggressive expansion program to expand its base to 4,200 MW of capacity by January 2008.

The success of the company's strategy is seen in its growing market share, repeat orders, and breakthroughs into new markets. Suzlon ranked as the world's fifth leading wind turbine manufacturer with over 6% of global marketshare in 2005. The company has ranked as the leading manufacturer in the Indian market for eight consecutive years, maintaining over 50% marketshare.

Suzlon's true strength is seen not only in its technology, quality and market share – but also its people. The company boasts one of the largest teams in the wind energy business, totaling over 9,000 people from over a dozen nationalities in operations around the world. Suzlon in its vision for future growth aims to rank among the top three wind turbine manufacturers worldwide, maximizing growth while maintaining margins for the benefit of all stakeholders.

**About PPM Energy** PPM Energy ([www.ppmenergy.com](http://www.ppmenergy.com)) now has more than 2,000 megawatts (MW) of wind energy in operation or under construction. The strength of its renewable project pipeline has allowed the company to increase its 2010 target by more than 50 percent to at least 3,500 MW developed or controlled by PPM Energy. PPM Energy balances its supply portfolio with sales to wholesale customers, placing almost all of its output in long-term contracts. Major customers include the cities of Seattle, Sacramento, Eugene, Pasadena, and Anaheim, as well as investor-owned utilities such as Xcel Energy and Pacific Gas & Electric Company and the federal Bonneville Power Administration. PPM Energy also creates innovative new products to meet customer needs including operations and maintenance services, and recently announced an expansion of its wind development activities into Canada.
